

Dear Hiring Manager,

I discovered the Programming Engineer internship with 《Akatsuki 曉數碼》 on facebook.com. Currently, I am a senior at National Ilan University, Department of Mechanical and Electro-Mechanical Engineering. Nevertheless, I keep on learning game development so that I am drawn to the opportunity to join this internship program.

I have created 2 simple games since with Unity3D last semester and tried developing different kinds of games. Through this experience, it improved my ability to solve problems. I was feeling frustrated while learning game programming, but I do not fear mistakes because it will make me better. I like developing games because I have a passion for it and enjoy it. I believe that I am a strong candidate for programming engineer because of my skill in Unity3D.

I hope my application is worthy of an invite to a face-to-face meeting with you. In case of any questions, please to contact me at (886)916 766 088 or via email at w8HxfWVrq@gmail.com. Thank you for your time and consideration.

Sincerely,

A rectangular box containing a handwritten signature in blue ink that reads "Pan, Guan Yu".

Pan, Guan Yu
